BD CONSTRUCTION WINS NATIONAL SAFETY AWARD

(KEARNEY, NE; December 16, 2008) — BD Construction of Kearney, Nebraska, has been recognized by the National Associated General Contractors of America for their excellent safety record the past three years. BD has maintained a zero incidence rate for over 50,000 work hours for three consecutive years, an incredible accomplishment.

The national safety award winners were recognized at the AGC Nebraska Building Chapter Fall Banquet in November. Certificates of Commendation were presented to five firms for excellent safety records of zero incidences.

“The strong commitment and awareness toward safety of our employees has improved the overall health of everyone at BD Construction,” stated BD Safety Director, Pete Keyes. “As a result we have experienced increased productivity by having injury free employees. That is no small accomplishment—with this award we are able to increase our market exposure and provide a safe work environment for everyone at BD.”

The AGC Nebraska Building Chapter, affiliated with AGC of America, is a statewide organization of qualified commercial contractor professionals dedicated to skill, integrity and responsibility in the industry. AGC member firms have quality people to build quality projects.

“I challenge all of our employees to continually treat safety at BD Construction as not just a daily priority,” stated Pete Keyes, “but rather a value.”

About BD Construction

Founded in 1960, BD Construction is today one of the Midwest’s leading construction companies, with a lengthy history of large scale building projects of every description, from hangars to hospitals to hotels. As design-build and construction management specialists, BD is capable of handling all aspects of a building project, starting with the initial concept and floor plans and continuing through site selection, design consultancy, project finance coordination, permitting, construction and evaluation of the finished project.
