**BD CONSTRUCTION BEGINS REMODEL AND EXPANSION
ON BRODSTONE MEMORIAL HOSPITAL IN SUPERIOR**

(KEARNEY, NE; August 18, 2009) — BD Construction, design-build and construction management specialists in Kearney, Nebraska, has begun work on the Brodstone Memorial Hospital in Superior, Nebraska. The project will include a remodel and expansion of the current hospital, adding a total of 21,500 square feet.

The hospital will feature a new clinic, laboratory and MRI and CT room. The new clinic will replace the original clinic built in the 1970's and will include six specialty exam rooms, an increase from the four rooms they currently have. In addition, BD Construction will remodel the sleep lab, cardiopulmonary, and diagnostic imaging areas. Along with the new space, the hospital will be adding new MRI and CT equipment. The expansion and remodel is expected to be completed in fall 2010. Partial funding for the project is made possible by the USDA and Thayer County Bank.

"Any time this type of diagnostic equipment is added to a hospital it requires a special type of construction," stated BD Construction President, Mark Benjamin. "There have been two years of planning and preparation put into the remodel and expansion to ensure that everything is done correctly, and to utilize the existing space to the best of our ability. I believe the remodel and expansion will be a very nice addition for the community."

"The remodel and expansion will allow for the hospital to increase the quality of healthcare in the area," stated Brodstone Memorial Hospital Chief Financial Officer, Sandy Borden. "This will bring better healthcare opportunities to Superior and the surrounding communities."

About BD Construction

Founded in 1960, BD Construction is today one of the Midwest's leading construction companies, with a lengthy history of large scale building projects of every description, from hangars to hospitals to hotels. As design-build and construction management specialists, BD is capable of handling all aspects of a building project, starting with the initial concept and floor plans and continuing through site selection, design consultancy, project finance coordination, permitting, construction and evaluation of the finished project.
