**BD CONSTRUCTION BREAKING GROUND ON  
FAITH CHRISTIAN SCHOOL**

**(KEARNEY, NE; May 15, 2009)** — BD Construction of Kearney, Nebraska, will break ground on Faith Christian School on Tuesday, May 19, at 4:00 pm. The non-denominational K-8 school will be located northwest of 17<sup>th</sup> Avenue and 56<sup>th</sup> Street in Kearney.

Construction on the school will start this summer. The completed structure will look different than any other school or building in Kearney – the shape and design of the building will have a modern appearance with a retro twist. The building project will include an initial 12,500 square feet of classrooms, administration offices, multipurpose room, conference room, library, and computer lab, along with a playground and athletic field. The building will also have a 12,500 square foot unfinished basement to allow for future expansion. Construction will be completed by the 2010-2011 school year.

“The new building will provide a positive, Christian learning environment for the children,” stated Andy Falk, head teacher. “The school will include additional space for the classes, yet the student/teacher ratios will still remain small, approximately 15:1. We are looking forward to being an educational role model in the community.”

Previously, classes for Faith Christian were held in local churches, so students will have their own school building for the first time. In addition, the building will give the school its own identity and more visibility in the community.

***About BD Construction***

*Founded in 1960, BD Construction is today one of the Midwest's leading construction companies, with a lengthy history of large scale building projects of every description, from hangars to hospitals to hotels. As design-build and construction management specialists, BD is capable of handling all aspects of a building project, starting with the initial concept and floor plans and continuing through site selection, design consultancy, project finance coordination, permitting, construction and evaluation of the finished project.
